FAX RECEIVED

SEP 29 2003

Dear Mr. Cesar:

PETITIONS OFFICE

Intermec Technologies Corporation has received rights from IBM to certain patents and technology in the RFID field, including title to your U.S. Patent No. 5,828,318 "System and Method for Selecting a Subset of Autonomous and Independent Slave Entities", and title to your patents with others (such as USP 5,673,037 RF Tag Group Select, and USP 5,942,987 RFID System with Write Broadcast Capability).

Currently, a continuation of USP 5,942,987 (YO995-218), has been allowed, but with a requirement that we submit a new Declaration signed by the inventors including yourself, Harley Heinrich, Thomas Cofino, and four others.

Since the deadline for filing the required Declaration is quite close, and Tom Cofino has been on vacation, it seems advisable to write you directly at this time, and ask for your present post office address where you customarily receive mail, so that this can be included on the required Declaration by the inventors.

Please enter your post office address at the bottom of the enclosed copy of this letter, and return it to me in the enclosed return addressed envelope. It would be very helpful to have your e-mail address as well.

Sincerely,

John H. (Jack) Sherman,
Registered Patent Attorney
